Dear Josh,

Thank you for your kind note regarding my mother. The acute event which included an episode of respiratory failure, was managed successfully. However the extent of her metastatic disease is such that I fear the respite will be short-lived. I am sorry that she took me away from the Evening at R.U. on such short notice.

With regard to Hanafusa, I do think there is hope for his nomination to the Academy. Igor and I discussed this about a year ago and found that he was not a citizen. I shall investigate whether this is still the case. If he has become a citizen I shall certainly nominate him; if not, I can nominate him as a Foreign Associate, although that is, of course, a much narrower window, since only two resident Foreign Associates can be elected each year.

Yours sincerely,
Russell
